

Biocidal ZF™

Spray Disinfectant for Incubators
and Sterile Cabinets in Cell Culture Area

Cell Culture Area

Effectiveness:

Biocidal ZF™ is effective against bacteria, spores and enveloped viruses.

Non-volatile:

Active microbiocidal ingredients are non-volatile. They protect cell cultures from microbial contamination and do not invade cell cultures via air. Thus cell cultures are protected against contamination and the disinfectant itself.

Application for incubators

- Empty incubator
- Spray Biocidal ZF™ on all surfaces and let settle
- Put cultures right back

Surfaces will be protected for 2-4 weeks.
(Before disinfecting you may clean incubator with Biocidal ZF™ if necessary)

Application in sterile benches

- Empty sterile bench
- Then clean with Biocidal ZF™ and finally spray on all surfaces.

Protection will prevail until next workshift.
No combustible gases can form, unlike by use of ethanol.
